

More information about some of the Companies being represented at Emerson's Mini Boutique...

Barefoot Books

- **Imagine**
We offer books that are an authentic alternative to the commercialization of childhood. We encourage children to make time for make-believe, let their imaginations run wild and free, while never forgetting that childhood is a time for fun.
- **Explore**
We help children explore other cultures, our planet, and themselves, providing them with ways to follow their imaginations on extraordinary journeys, both inner and outer.
- **Create**
We believe that books with beautiful art and meaningful stories respect the innate wisdom of children and have the power to nourish the creative spark in everyone.
- **Connect**
We are committed to using story to create deep and lasting connections—whether it's a child and parent connecting over a book; a child connecting to the universal wisdom of other cultures; or a broad network of people connecting through shared values and the desire to help children become happy, engaged members of a global community.
- **Give Back**
We support organizations that share our goals of global understanding, empowering children through art and story, and protecting and preserving the earth for future generations.

Putumayo Music

- Music of the world's cultures
- Our cds introduce children to other cultures through fun, upbeat world music.
- The company's commitment to helping communities in the countries where the music originates has led to the label contributing more than one million dollars to worthwhile non-profit organizations around the world.
